End State

Compliance

&

Improved Readiness

LOO 1

Training

- Utilize Instructor Lead (IL) program with the User Productivity Kit (UPK) to teach GCSS-MC.
- Employ Over the Shoulder Training (OTS) at unit offices to augment classroom training.
- Focus on qualitative and quantitative results, i.e., must target the training, provide the correct courses, and provide quality training.
- Evaluate current IL UPK instruction to inform curriculum development.
- Establish time every month for curriculum development.
- Pass curriculum development TTPs to TECOM.

LOO 2

Compliance Validation

- Utilize formal FSMAO Inspections & Results
- Utilize FSMAO Trends & Analysis Reports (monthly review with units)
- Utilize unit Inspector General for focused inspections
- Utilize 3d MLG Enhanced Supply & Maintenance Analysis Team (ESMAT) for monthly inspections on 3d MLG units

LOO 3

Strategic Communication

- GCSS-MC Training
- GCSS-MC Utilization
- Urgency to fully employ GCSS-MC as the logistics platform
- Report Usage
- Utilization GCSS-MC and MTS during exercises
- Command Attention

Operational Testing

- **Cobra Gold 13 – not used**
  - MAGTF presence
  - Robust equipment sets
  - Limited GCSS-MC connectivity, relied primarily on reach-back/"courier"
  - Communications assets: SWAN and LMST
- **Guahan Shield 13 – partial use**
  - Exercise ongoing in Guam (Inf Co, LCE, FCE)
  - Limited Equipment (Small Arms, Transportation, Engineering)
  - Robust communications architecture at Naval Computer and Telecommunications Station, Guam (NCTS) enabling full internet capability and reach-back redundancy
- **Balikatan 13 – used**
  - Worked with contracted commercial internet
  - Tactical NIPR access was slow and limited.

Deployed Concept of Support

Concept of Support:
Utilize a Hub & Spoke method that effectively integrates GCSS-MC and other MLS2 to link primary and satellite (UDP) locations. Satellite locations will execute connectivity through tactical or contracted internet services over an optimized computer network architecture.

**Primary Hubs** (Permanent Base Structures with full connectivity for MLS2)
- Okinawa (3D MLG, CLR-3, CLR-35, CLR-37, 9th ESB)
- Hawaii (CLB-3, CLC 35)
- Iwakuni (CLC-36)

Satellite (UDP) Locations
(Tactical/Semi-Permanent Positions with limited to full connectivity for MLS2)
- Guam* (CLD-39 → 9th ESB)
- Philippines (CLD-33 → CLB-3, CLR-3)
- Australia (CLD-34 → CLB-4, CLR-3)
- Thailand (TBD)

Proposed Combat Logistics Detachment (CLD) Laydown & Planned MLS2 Architecture

CLC-36 IWAKUNI

MLG

CLD (UDP) THAILAND

CLD 39 (UDP) GUAM

CLC-35 HAWAII

CLD 33 (UDP) PHILIPPINES

CLD 34 (UDP) DARWIN

3d MLG School House

- Statistics & Summary
  - Number of students: **514** (7 Jan – 29 Mar)
  - TECOM Instructors assisted in Master Lesson File development.
- Quarterly Training Schedules ISO MAGTF and designated MCI-Pac units
  - Okinawa
  - Iwakuni (Semi-Annually)
  - Hawaii (Semi-Annually)
  - Schedules responsive to TEEP obligations and built to accommodate demand
- Master Lesson File development
  - Currently finalizing Master Lesson Files for institutional review
    - 12 Completed
    - 6 Drafts in progress

3d MLG School House

- Targeted Training and "Marketing Plan" to spread the gospel and support Strategic Communication LOO
  - SNCO Academy Brief
  - E-8 Seminar

- Database Development
  - Critical Users (Trained, Untrained, Inactive)
  - Tailored Unit Templates that Identify "Required" and "Recommended" courses ***by billet***.

- 3d MLG/III MEF will continue to work with I and II MEF MRTCs and FSMAO – WP to refine course material and incorporate trend analysis back into curriculum.

Training and FSMAO
